The Real Estate Developers Association of Hong Kong 50th Anniversary

Together we bore witness to the transformation of Hong Kong
Hand in hand with Hong Kong people writing the Hong Kong story

The Real Estate Developers Association of Hong Kong (REDA) hosted a cocktail reception today on the occasion of its 50th Anniversary. The Chief Executive of the Hong Kong Special Administrative Region Honourable CY Leung, the Central People's Government Liaison Office Deputy Director Ms. Yin Xiaojing, the Financial Secretary Honourable John Tsang, and the President of the Legislative Council Honourable Jasper Tsang, in the company of guests and REDA members, witnessed how the Association had worked with the various sectors of our society to foster the progress and prosperity of Hong Kong.

Hong Kong has transformed in the economic take-off from a manufacturing-oriented economy into an international financial centre. In the past five decades, REDA has been playing the role of city builder, working hand in hand with Hong Kong people in writing the success stories of our city.

Mr. Keith Kerr, President of REDA, shared in the 50th Anniversary video, "The core of what makes HK people special is their ability to change, their zest for life. Overall, it's their general positiveness, to bounce back and come back again and face the future, and wake up and see the glass is half full and not half empty." As a member of the community, REDA will continue to work diligently and in partnership with Hong Kong people to contribute to the development of Hong Kong.

Mr. Stewart Leung, Chairman of the Executive Committee of REDA, expressed gratitude for the support of all REDA members throughout the years. "We are particularly grateful for the continued and steadfast support of our members for REDA. They have played a significant role in implementing Government's housing policy and facilitating economic development. Responding to the society's changing needs, they will continue to bring forth new development initiatives in order to create a better and sustainable society," Mr. Leung remarked.
